Filtering the Calendar

Filter By Calendar Type

Every course has its own calendar in MyCourses. By default, the events on all of these calendars are shown in each view of your calendar. To filter out specific calendars, choose the All Calendars dropdown and select the calendar to filter.

Dates for the calendars are color coded, so when filtered, you will only see events for that calendar.

This example shows “Sample Course” dates only.

Un-filter the Calendar

To return to the default of All Calendars, click Show All Calendars button under the Calendar Drop Down menu. All of events for all courses will return.
