Using Search

Courses can contain multiple content items including quizzes, activities, assignments, calendar events and documents. In addition to the Bookmarks tool, the search feature can help you find something quickly within a course.

Searching Topics

The Search Box is located above the Table of Contents bar.

To perform a search, enter a Keyword or query into the search box and press enter.

The search results will appear to the right of the module bar. Clicking on an item takes you directly to that content.

Example 1: Search for “Paper”

Example 2: Search for “Syllabus”
